

PRODUCT INFORMATION

| | |
|---|--|
| Clone ID | DMC275 |
| Target | ALB |
| Synonyms | HSA; PRO0883; PRO0903; PRO1341 |
| Host Species | Rabbit |
| Description | Anti-ALB antibody(DMC275); IgG1 Chimeric mAb |
| Delivery | In Stock |
| Uniprot ID | P02768 |
| IgG type | Rabbit/Human Fc chimeric IgG1 |
| Clonality | Monoclonal |
| Reactivity | Human |
| Applications | Flow Cyt |
| Recommended Dilutions | Flow Cyt 1:100 |
| Purification | Purified from cell culture supernatant by affinity chromatography |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage & Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | This gene encodes the most abundant protein in human blood. This protein functions in the regulation of blood plasma colloid osmotic pressure and acts as a carrier protein for a wide range of endogenous molecules including hormones; fatty acids; and metabolites; as well as exogenous drugs. Additionally; this protein exhibits an esterase-like activity with broad substrate specificity. The encoded preproprotein is proteolytically processed to generate the mature protein. A peptide derived from this protein; EPI-X4; is an endogenous inhibitor of the CXCR4 chemokine receptor. |
| Usage | Research use only |
| Conjugate | Unconjugated |

Figure 1. Flow cytometry analysis with Anti-ALB (DMC275) on Expi293 cells transfected with human ALB (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).
