## PRODUCT INFORMATION

| Common Name | BM323 |
| :---: | :---: |
| Synonyms | CD3e, T3E |
| Applications | Flow Cyt |
| Recommended Dilutions | Flow Cyt 1:100 |
| Formulation \& Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 $\%-8 \%$ trehalose is added as protectants before Iyophilization. Please see Certificate of Analysis for specific instructions. |
| Host Species | Humanized |
| IgG type | IgG1 |
| Reactivity | Human |
| Target | CD3E |
| Uniprot ID | P07766 |
| Description | Anti-CD3E(DIMA BM323) mAb |
| Delivery | In Stock |
| Storage \& Shipping | Store at $-20^{\circ} \mathrm{C}$ to $-80^{\circ} \mathrm{C}$ for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at $-80^{\circ} \mathrm{C}$ (Avoid repeated freezing and thawing).Lyophilized antibodies are shipped at ambient temperature. |
| Background | Research grade biosimilar. Not for use in therapeutic or diagnostic procedures for humans or animals. |
| Usage | Research use only |

## $\times$

Figure 1. CD3E protein is highly expressed inside Jurkat cells. Flow cytometry analysis with $1 \mu \mathrm{~g} / \mathrm{mL}$ Anti-CD3E(DIMA BM323) mAb (BME100140) (Blue histogram) or isotype control mAb (Red histogram) on Jurkat cells.

Figure 2. Flow cytometry analysis of antigen binding of anti-human CD3E mAb(BME100140).
(A) BME100140 does not bind to 293T cells that do not express CD3E.
(B) A clear peak shift of BME100140 was seen compared to the control when incubated with CD3E-expressing Jurkat cells, indicating strong binding of BME100140 to CD3E. Antibodies were incubated at $5 \mu \mathrm{~g} / \mathrm{mL}$.
