

PRODUCT INFORMATION

Clone ID	407H9
Target	CLDN6
Synonyms	Claudin 6;Claudin-6;Skullin
Host Species	Rabbit
Description	Anti-CLDN6 antibody(407H9), IgG1 Chimeric mAb
Delivery	In Stock
Uniprot ID	P56747
IgG type	Rabbit/Human Fc chimeric IgG1
Clonality	Monoclonal
Reactivity	Human
Applications	Flow Cyt
Recommended Dilutions	Flow Cyt 1/100
Purification	Purified from cell culture supernatant by affinity chromatography
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Storage & Shipping	
Background	Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space. These junctions are comprised of sets of continuous networking strands in the outwardly facing cytoplasmic leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. This gene encodes a component of tight junction strands, which is a member of the claudin family. The protein is an integral membrane protein and is one of the entry cofactors for hepatitis C virus. The gene methylation may be involved in esophageal tumorigenesis. This gene is adjacent to another family member CLDN9 on chromosome 16.[provided by RefSeq, Aug 2010]
Usage	Research use only
Conjugate	Unconjugated

Figure 1. Flow cytometry analysis with $1\mu\text{g}/\text{mL}$ Anti-CLDN6 (407H9) mAb on Expi293 cells transfected with human CLDN6 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).
