Anti-CD142(tisotumab biosimilar) mAb Cat. No. BME100124

## **PRODUCT INFORMATION**

| Common Name                     | HuMax-TF  |
|---------------------------------|---|
| Synonyms                        | Tissue factor, TF, F3, Thromboplastin, Coagulation<br>factor III  |
| Conjugate                       | Unconjugated  |
| Applications                    | ELISA, Flow Cyt   |
| Recommended<br>Dilutions        | ELISA 1:5000-10000, Flow Cyt 1:100  |
| Formulation &<br>Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5<br>% – 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.   |
| Host Species                    | Homo sapiens  |
| lgG type                        | lgG1  |
| Reactivity                      | Human   |
| Target                          | CD142   |
| Uniprot ID                      | P13726  |
| Description                     | Anti-CD142(tisotumab biosimilar) mAb  |
| Delivery                        | In Stock  |
| Storage & Shipping              | Store at -20°C to -80°C for 12 months in<br>lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature.                    |
| Background                      | Research grade biosimilar. Not for use in therapeutic or diagnostic procedures for humans or animals.   |
| Usage                           | Research use only   |
| DIMA Disclaimer                 | All DIMA recombinant antibodies are genuinely<br>generated by DIMA Biotech. They are all under<br>patent application. Any protein sequencing or<br>reverse engineering attempt is prohibited. We are<br>actively scrutinizing all patent application to<br>ensure no IP infringement. |
|                                 |   |

## Anti-CD142 (tisotumab biosimilar) mAb ELISA

0.2 µg of Human CD142, hFc tagged protein per well

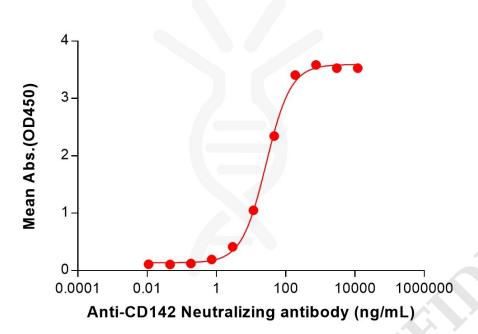

Figure 1. ELISA plate pre-coated by 2  $\mu$ g/mL (100  $\mu$ L/well) Human CD142 Protein, hFc Tag (PME100751) can bind Anti-CD142 Neutralizing antibody (BME100124) in a linear range of 2.93–187.50 ng/mL. In order to specifically detect BME100124, mouse anti-human Fab-specific antibody was used as detection antibody.

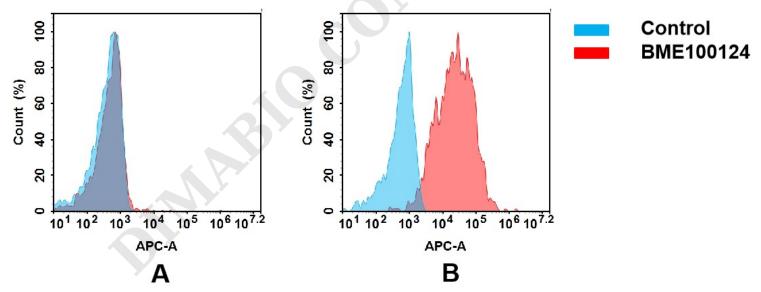

Figure 2. Flow cytometry analysis of antigen binding of anti-human CD142 mAb(BME100124). (A) BME100124 does not bind to CHO-S cells that do not express CD142. (B) A clear peak shift of BME100124 was seen compared to the control when incubated with CD142-expressing Hela cells, indicating strong binding of BME100124 to CD142. Antibodies were incubated at 5  $\mu$ g/mL.
