

PRODUCT INFORMATION

Clone ID DMC721 **Target** IGF-1R

Synonyms CD221; IGFIR; IGFR; JTK13

Host Species Rabbit

Anti-IGF-1R antibody(DMC721); IgG1 Chimeric Description mAb

Delivery In Stock **Uniprot ID** P08069

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Background

DIMA Disclaimer

Flow Cyt 1/100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This receptor binds insulin-like growth factor with a high affinity. It has tyrosine kinase activity. The insulin-like growth factor I receptor plays a critical role in transformation events. Cleavage of the precursor generates alpha and beta subunits. It is highly overexpressed in most malignant tissues

where it functions as an anti-apoptotic agent by enhancing cell survival. Alternatively spliced transcript variants encoding distinct isoforms have been found for this gene. [provided by

RefSeg, May 2014]

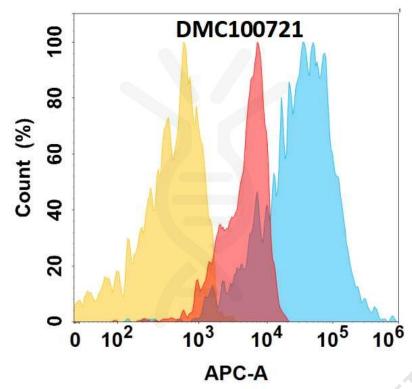

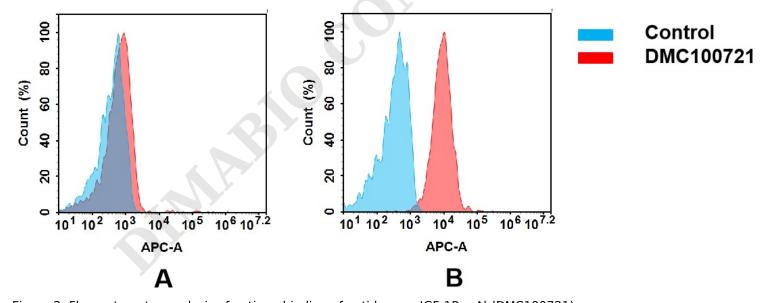

Figure 1. IGF-1R protein is highly expressed on the surface of Expi293 cell membrane. Flow cytometry analysis with Anti-IGF-1R (DMC721) mAb on Expi293 cells transfected with human IGF-1R (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram), and Isotype antibody on Expi293 transfected with irrelevant protein (Orange histogram).

Figure~2.~Flow~cytometry~analysis~of~antigen~binding~of~anti-human~IGF-1R~mAb (DMC100721).

(A) DMC100721 does not bind to Jurkat cells that do not express IGF-1R. (B) A clear peak shift of DMC100721 was seen compared to the control when incubated with IGF-1R-expressing MCF-7 cells, indicating strong binding of DMC100721 to IGF-1R. Antibodies were incubated at 5 μ g/mL.

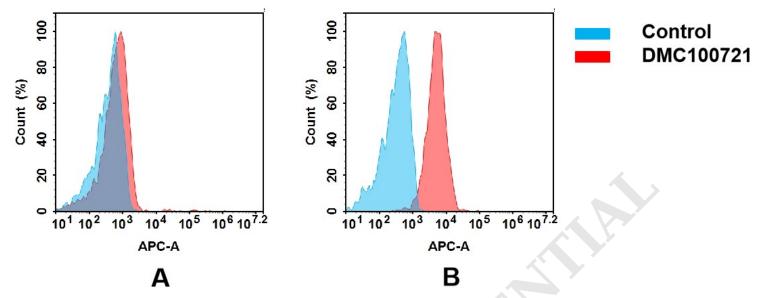

Figure 3. Flow cytometry analysis of antigen binding of anti-human IGF-1R mAb(DMC100721). (A) DMC100721 does not bind to Jurkat cells that do not express IGF-1R . (B) A clear peak shift of DMC100721 was seen compared to the control when incubated with IGF-1R-expressing Hela cells, indicating strong binding of DMC100721 to IGF-1R. Antibodies were incubated at 5 μ g/mL.
