

PRODUCT INFORMATION

Clone ID DM174 ROR2 **Target**

ROR2:NTRKR2 **Synonyms**

Host Species Rabbit

Description Anti-ROR2 antibody(DM174); Rabbit mAb

Delivery In Stock **Uniprot ID** Q01974 IgG type Rabbit IgG Clonality Monoclonal

Applications ELISA; Flow Cyt; WB

Human

Recommended

Reactivity

ELISA 1:5000-10000; Flow Cyt 1:100; WB 1:1000 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a receptor protein tyrosine kinase and type I transmembrane protein that belongs to the ROR subfamily of cell surface receptors. The protein may be involved in the early formation of the chondrocytes and may be required for cartilage and growth plate

development. Mutations in this gene can cause brachydactyly type B; a skeletal disorder characterized by hypoplasia:aplasia of distal phalanges and nails. In addition; mutations in this gene can cause the autosomal recessive form of Robinow syndrome; which is characterized by skeletal dysplasia with generalized limb bone shortening; segmental defects of the spine; brachydactyly; and a dysmorphic facial

appearance.

Usage Research use only Conjugate Unconjugated

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are

DIMA Disclaimer

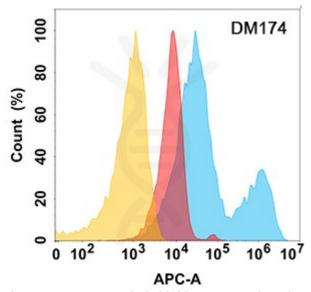

Figure 1. ROR2 protein is highly expressed on the surface of Expi293 cell membrane. Flow cytometry analysis with Anti-ROR2 (DM174) on Expi293 cells transfected with human ROR2 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram), and Isotype antibody on Expi293 transfected with irrelevant protein (Orange histogram).

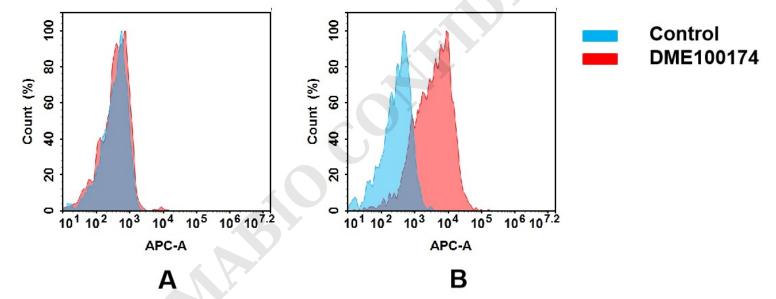

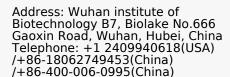

Figure 2. Flow cytometry analysis of antigen binding of rabbit anti-human ROR2 mAb(DME100174).

(A) DME100174 does not bind to Jurkat cells that do not express ROR2. (B) A clear peak shift of DME100174 was seen compared to the control when incubated with ROR2-expressing Raji cells, indicating strong binding of DME100174 to ROR2. Antibodies were incubated at 5 μ g/mL.
