Background

## **PRODUCT INFORMATION**

Target B7-H3

Monoclonal Cell Line Derived from K562 Cells,
Engineered for Stable Expression of Human B7H3

Using Lentiviral Technology

Host Cells K562
Uniprot ID Q5ZPR3
Applications FACS Data

Growth media RPMI-1640+10% FBS+1% P.S+Gln+2 ug/mL

Puromycin 5E6 Cells/mL

Host Species Human

**Suggested Control** SKU: BME100181

1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Storage & Shipping

Cells are shipped using dry ice and require liquid

nitrogen storage for long term preservation.

**Synonyms** B7H3;CD276;4lg-B7-H3

The protein encoded by this gene belongs to the immunoglobulin superfamily, and thought to participate in the regulation of T-cell-mediated immune response. Studies show that while the transcript of this gene is ubiquitously expressed in normal tissues and solid tumors, the protein is preferentially expressed only in tumor tissues. Additionally, it was observed that the 3' UTR of this transcript contains a target site for miR29

this transcript contains a target site for miR29 microRNA, and there is an inverse correlation between the expression of this protein and miR29 levels, suggesting regulation of expression of this gene product by miR29. Alternatively spliced transcript variants encoding different isoforms
