Background

PRODUCT INFORMATION

CD166 **Target**

Monoclonal Cell Line Derived from K562 Cells, Description Engineered for Stable Expression of Human

CD166 Using Lentiviral Technology

Host Cells K562 Q13740-1 **Uniprot ID**

RPMI-1640+10% FBS+1% P.S+1% Gln+2 ug/mL **Growth media**

Puromycin

FACS Data

Package 5E6 Cells/mL

Host Species Human

SKU: BME100172 **Suggested Control**

> 1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Cells are shipped using dry ice and require liquid Storage & Shipping

nitrogen storage for long term preservation.

Synonyms CD166; MEMD

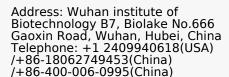

> This gene encodes activated leukocyte cell adhesion molecule (ALCAM); also known as CD166 (cluster of differentiation 166); which is a member of a subfamily of immunoglobulin receptors with five immunoglobulin-like domains (VVC2C2C2) in the extracellular domain. This protein binds to T-cell differentiation antigene CD6; and is implicated in the processes of cell

adhesion and migration. Multiple alternatively spliced transcript variants encoding different isoforms have been found. [provided by RefSeq;
