Cat. No. CEL100021

PRODUCT INFORMATION

Target EGFR VIII

Monoclonal Cell Line Derived from K562 Cells,
Engineered for Stable Expression of Human EGFR

VIII Using Lentiviral Technology

Host Cells K562
Uniprot ID P00533
Applications FACS Data

Growth media RPMI-1640+10% FBS+1% P.S+1% Gln+2 ug/mL

Puromycin 5E6 Cells/mL

Package 5E6 Cell
Host Species Human

Warranty and

Disclaimer

Background

Suggested Control SKU: DMC101040

1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Storage & Shipping

Cells are shipped using dry ice and require liquid

nitrogen storage for long term preservation.

Synonyms EGFR;RBB;RBB1;ER1;IG61;ENA

The protein encoded by this gene is a

transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization

> Email: info@dimabio.com Website: www.dimabio.com

protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are

associated with lung cancer.

Usage For research use only.
