

## **PRODUCT INFORMATION**

GPC1 **Target** 

Monoclonal Cell Line Derived from CHO-S Cells Description Engineered for Stable Expression of Human GPC1

Using Lentiviral Technology

**Host Cells** CHO-S P35052 **Uniprot ID Applications FACS Data** 

DMEM+10% FBS+1% P.S+Gln+2 ug/mL **Growth media** 

Puromycin **Package** 5E6 Cells/mL

**Host Species** Human

Warranty and

Disclaimer

SKU: DMC101004 **Suggested Control** 

> 1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Cells are shipped using dry ice and require liquid Storage & Shipping

nitrogen storage for long term preservation.

Synonyms Glypican 1;GPC1

> Cell surface heparan sulfate proteoglycans are composed of a membrane-associated protein core substituted with a variable number of heparan sulfate chains. Members of the glypican-related integral membrane proteoglycan family (GRIPS) contain a core protein anchored to the

Background

cytoplasmic membrane via a glycosyl phosphatidylinositol linkage. These proteins may

play a role in the control of cell division and growth regulation. [provided by RefSeq, Jul 2008]
