

PRODUCT INFORMATION

Tag C-Flag Tag **Target** 5HT1B

5-HT-1B, 5-HT-1D-beta, 5-HT1B, 5-HT1DB, **Synonyms**

HTR1D2, HTR1DB, S12

Human 5HT1B full length protein-synthetic Description

nanodisc

Delivery 6~8weeks **Uniprot ID** P28222 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome, GPCRDB Class A Rhodopsin-like, Monoamine **Protein Pathways**

GPCRs,

The human full length 5HT1B protein has a MW of **Molecular Weight**

43.6kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Formulation & for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater Reconstitution

than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this intronless gene is a G-protein coupled receptor for serotonin (5hydroxytryptamine). Ligand binding activates second messengers that inhibit the activity of adenylate cyclase and manage the release of serotonin, dopamine, and acetylcholine in the brain. The encoded protein may be involved in

several neuropsychiatric disorders and therefore is often a target of antidepressant and other psychotherapeutic drugs. [provided by RefSeq,
