PRODUCT INFORMATION

C-Flag Tag Tag **Target** 5HT1F

Synonyms 5-HT-1F, 5-HT1F, 5HT6, HTR1EL, MR77 Human 5HT1F full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P30939 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, GPCRDB **Protein Pathways**

Other, Monoamine GPCRs,

The human full length 5HT1F protein has a MW of **Molecular Weight**

41.7kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

Reconstitution a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

G-protein coupled receptor for 5-hydroxytryptamine (serotonin). Also functions as a receptor for various alkaloids and psychoactive

substances. Ligand binding causes a

conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of down-stream **Background**

effectors, such as adenylate cyclase. Signaling

inhibits adenylate cyclase activity.[UniProtKB/Swiss-Prot Function]

Usage Research use only Conjugate Unconjugated
