Cat. No. FLP100171

Formulation &

Reconstitution

Storage & Shipping

Background

PRODUCT INFORMATION

C-Flag Tag Tag **Target** 5HT6R

Synonyms 5-HT6, 5-HT6R

Human 5HT6R full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P50406 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, Monoamine **Protein Pathways** GPCRs,

The human full length 5HT6R protein has a MW of **Molecular Weight**

47kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a protein that belongs to the seven-transmembrane G protein-coupled receptor family of proteins. The encoded protein couples with the Gs alpha subunit and stimulates adenylate cyclase to activate the cyclic AMP-

dependent signaling pathway. This receptor is thought to regulate cholinergic neuronal

transmission in the brain. Several antidepressants and antipsychotic drugs have a high affinity for this receptor. [provided by RefSeq, Aug 2013]
