Cat. No. PME101683

PRODUCT INFORMATION

5T4 **Target**

Synonyms TPBG; M6P1; 5T4AG; WAIF1

Recombinant human 5T4(114-140) Protein with C-**Description**

terminal human Fc tag

Delivery In Stock **Uniprot ID** Q13641 **Expression Host HEK293**

Tag C-Human Fc tag

Molecular

Storage & Shipping

Background

5T4(Arg114-His140) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight**

29.0 kDa after removal of the signal peptide. The apparent molecular mass of 5T4(114-140)-hFc is approximately 25-55 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a leucine-rich transmembrane glycoprotein that may be involved in cell

adhesion. The encoded protein is an oncofetal antigen that is specific to trophoblast cells. In adults this protein is highly expressed in many tumor cells and is associated with poor clinical outcome in numerous cancers. Alternate splicing

in the 5' UTR results in multiple transcript variants that encode the same protein. [provided
