

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

ACM5 **Target Synonyms** HM₅

Storage & Shipping

Background

Human ACM5-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P08912 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

Calcium regulation in cardiac cells, GPCRDB Class A Rhodopsin-like, Monoamine GPCRs, Regulation of Actin Cytoskeleton KEGG, **Protein Pathways**

The human full length ACM5-Strep protein has a **Molecular Weight**

MW of 60.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The muscarinic cholinergic receptors belong to a larger family of G protein-coupled receptors. The functional diversity of these receptors is defined by the binding of acetylcholine and includes cellular responses such as adenylate cyclase inhibition, phosphoinositide degeneration, and potassium channel mediation. Muscarinic

receptors influence many effects of acetylcholine in the central and peripheral nervous system. The

clinical implications of this receptor are unknown; however, stimulation of this receptor is known to increase cyclic AMP levels. [provided by RefSeq,

Jul 2008]

Usage Research use only Conjugate Unconjugated
