

PRODUCT INFORMATION

Tag C-Flag&Strep Tag	
Target AGRG4	
Synonyms GPR112, PGR17, RP1-299I16	
Description Human AGRG4-Strep full length protein-synthet nanodisc	ic
Delivery 6~8weeks	
Uniprot ID Q8IZF6	
Expression Host HEK293	
Protein Families Transmembrane, Druggable Genome,	
Protein Pathways N/A	
Molecular Weight The human full length AGRG4-Strep protein has MW of 333.4 kDa	a
Formulation & Reconstitution Formulation & Reconstitution	%
Storage & Shipping Storage & Shipping Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and sto at -80°C (Avoid repeated freezing and thawing) Lyophilized proteins are shipped at ambient temperature.	
 Background Background This gene encodes a G-protein coupled receptor belonging to a large family of diverse integral membrane proteins that participate in various physiological functions. Members of this superfamily are characterized by a signature 7-transmembrane domain motif. The ligand for th family member is unknown, and it is therefore a orphan receptor. This receptor is known to be expressed in normal enterochromaffin cells and gastrointestinal neuroendocrine carcinoma cells and it is therefore considered to be a novel biomarker or target for immunotherapy. [provided by RefSeq, May 2010] 	is an I in
Usage Research use only	
Conjugate Unconjugated
