PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target ASIC4

Synonyms ACCN4, BNAC4

Human ASIC4-Strep full length protein-synthetic **Description**

nanodisc 6~8weeks

Uniprot ID Q96FT7 **Expression Host HEK293**

Protein Families Ion Channels: Other

Protein Pathways N/A

The human full length ASIC4-Strep protein has a **Molecular Weight**

MW of 70.1 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Formulation & Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Lyophilized from nanodisc solubilization buffer (20

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene belongs to the superfamily of acid-sensing ion channels, which are proton-gated, amiloride-sensitive sodium channels. These channels have been implicated in synaptic transmission, pain perception as well as

mechanoperception. This gene is predominantly expressed in the pituitary gland, and was considered a candidate for paroxysmal dystonic **Background**

choreoathetosis (PDC), a movement disorder, however, no correlation was found between mutations in this gene and PDC. [provided by
