

PRODUCT INFORMATION

C-Flag Tag Tag **Target** BACD1

BACURD1, FKSG86, PDIP1, POLDIP1, hBACURD1 **Synonyms** Human BACD1 full length protein-synthetic

Description nanodisc **Delivery** 6~8weeks **Uniprot ID** Q8WZ19 **Expression Host HEK293**

Protein Families Ion Channels: Other

Protein Pathways N/A

The human full length BACD1 protein has a MW of **Molecular Weight**

36.4kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

Substrate-specific adapter of a BCR (BTB-CUL3-RBX1) E3 ubiquitin-protein ligase complex required for synaptic transmission (PubMed:19782033). The BCR(KCTD13) E3

Background

ubiquitin ligase complex mediates the ubiquitination of RHOA, leading to its degradation by the proteasome (PubMed:19782033)
Degradation of RHOA regulates the actin

cytoskeleton and promotes synaptic transmission (By similarity).[UniProtKB/Swiss-Prot Function]
