Cat. No. PME100035

PRODUCT INFORMATION

Target BCMA

TNFRSF17;CD269;BCM;BCMA **Synonyms**

Recombinant human BCMA protein with C-**Description**

terminal mouse Fc tag

Delivery In Stock Q02223 **Uniprot ID Expression Host HEK293**

Tag C-Mouse Fc Tag

Molecular

Background

BCMA(Met1-Ala54) mFc(Pro99-Lys330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 32.1 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

B-cell maturation protein (BCMA or BCM), is also known as Tumor necrosis factor receptor superfamily member 17 (TNFRSF17), which is encoded by the TNFRSF17 gene. TNFRSF17 is a

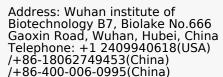

cell surface receptor of the TNF receptor superfamily which recognizes B-cell activating factor (BAFF). This receptor is expressed in

immune organs and mature B cell lines. BCMA promotes B-cell survival and plays a role in the regulation of humoral immunity. BCMA can activate NF-kappa-B and JNK.

Usage Research use only

Conjugate Unconjugated
