

PRODUCT INFORMATION

C-Flag Tag Tag

CB1 **Target**

Synonyms CANN6; CB-R; CNR1; CB1A; CB1K5; CB1R; CNR **Description** Human CB1 full length protein-synthetic nanodisc

Delivery In Stock **Uniprot ID** P21554 **Expression Host HEK293**

Protein Families

Formulation & Reconstitution

Storage & Shipping

Conjugate

Neuroactive ligand-receptor interaction **Protein Pathways**

The human full length CB1 Protein has a MW of **Molecular Weight**

52.7 kDa

GPCR

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

Lyophilized from nanodisc solubilization buffer (20

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The cannabinoids, principally delta-9-

tetrahydrocannabinol and synthetic analogs, are psychoactive ingredients of marijuana. The cannabinoid receptors are members of the guanine-nucleotide-binding protein (G-protein) coupled receptor family, which inhibit adenylate cyclase activity in a dose-dependent,

Background stereoselective and pertussis toxin-sensitive manner. The two receptors have been found to be involved in the cannabinoid-induced CNS effects (including alterations in mood and cognition) experienced by users of marijuana. Multiple

transcript variants encoding two different protein isoforms have been described for this gene.

Usage Research use only

Unconjugated

ELISA assay to evaluate CB1-Nanodisc 0.2µg Human CB1-Nanodisc per well

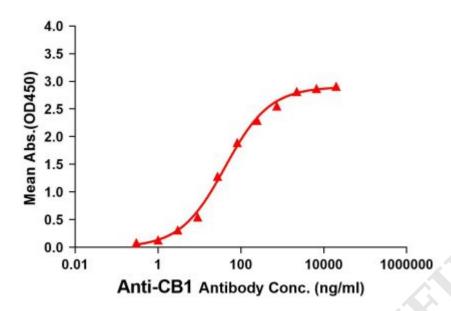

Figure 1. Elisa plates were pre-coated with Flag Tag CB1-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-CB1 monoclonal antibody (DME100144) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-CB1 monoclonal antibody binding with CB1-Nanodisc is 41.62ng/ml.
