

PRODUCT INFORMATION

Tag C-Flag Tag

Target CCR7

Synonyms

BLR2; CC-CKR-7; CCR-7; CD197; CDw197;

CMKBR7; EBI1

DescriptionHuman CCR7 full length protein-synthetic

nanodisc

Delivery In Stock
Uniprot ID P32248
Expression Host HEK293

Formulation &

Reconstitution

Protein Families Druggable Genome, GPCR, Transmembrane

Protein PathwaysChemokine signaling pathway, Cytokine-cytokine

receptor interaction

Molecular Weight

The human full length CCR7 protein has a MW of

42.9 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein is a member of the G protein-coupled receptor family. This receptor was identified as a gene induced by the Epstein-Barr virus (EBV), and is thought to be a mediator of EBV effects on B lymphocytes. This receptor is expressed in various lymphoid tissues and activates B and T lymphocytes. It has been shown to control the migration of memory T cells to inflamed tissues,

Background

migration of memory T cells to inflamed tissues, as well as stimulate dendritic cell maturation. The chemokine (C-C motif) ligand 19 (CCL19/ECL) has been reported to be a specific ligand of this

been reported to be a specific ligand of this receptor. Signals mediated by this receptor regulate T cell homeostasis in lymph nodes, and may also function in the activation and

polarization of T cells, and in chronic inflammation pathogenesis.

Usage Research use only
Conjugate Unconjugated

ELISA assay to evaluate CCR7-Nanodisc 0.2μg Human CCR7-Nanodisc per well

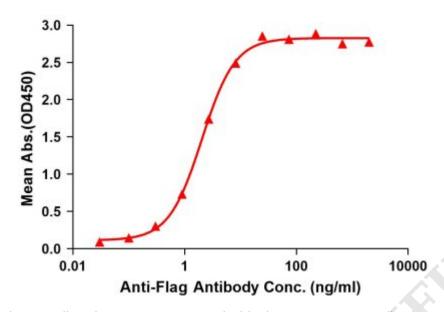

Figure 1. Elisa plates were pre-coated with Flag Tag CCR7-Nanodisc (0.2 μ g/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with CCR7-Nanodisc is 2.044ng/ml.
