PRODUCT INFORMATION

Target	CDH1
Synonyms	UVO; CDHE; ECAD; LCAM; Arc-1; BCDS1; CD324
Description	Recombinant human CDH1(594-709) Protein with C-terminal human Fc tag
Delivery	In Stock
Uniprot ID	P12830
Expression Host	HEK293
Tag	C-Human Fc tag
Molecular Characterization	CDH1(Ile594-Ala709) hFc(Glu99-Ala330)
Molecular Weight	The protein has a predicted molecular mass of 38.9 kDa after removal of the signal peptide. The apparent molecular mass of CDH1(594-709)-hFc is approximately 35-55 kDa due to glycosylation.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. Mutations in this gene are correlated with gastric, breast, colorectal, thyroid and ovarian cancer. Loss of function of this gene is thought to contribute to cancer progression by increasing proliferation, invasion, and/or metastasis. The ectodomain of this protein mediates bacterial adhesion to mammalian cells and the cytoplasmic domain is required for internalization. This gene is present in a gene cluster with other members of the cadherin family on chromosome 16. [provided by RefSeq, Nov 2015]
Usage	Research use only
Conjugate	Unconjugated
