Cat. No. PME101613

PRODUCT INFORMATION

Target CDH3

Synonyms CDHP; HJMD; PCAD

Recombinant human CDH3(216-328) Protein with Description

C-terminal human Fc tag

Delivery In Stock **Uniprot ID** P22223 **Expression Host HEK293**

Tag C-Human Fc tag

Molecular

Background

CDH3(Thr216-Phe328) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 38.3 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before

Formulation & lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results in multiple transcript variants, at least one of

which encodes a preproprotein that is

proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. This gene is located in a gene cluster in a region on the langer located in a gene cluster in a region on the long arm of chromosome 16 that is involved in loss of

heterozygosity events in breast and prostate cancer. In addition, aberrant expression of this protein is observed in cervical adenocarcinomas. Mutations in this gene are associated with

hypotrichosis with juvenile macular dystrophy and ectodermal dysplasia, ectrodactyly, and macular dystrophy syndrone (EEMS). [provided by

RefSeq, Nov 2015]

Usage Research use only Conjugate Unconjugated
