

PRODUCT INFORMATION

| | |
|---|---|
| Target | CLEC2D |
| Synonyms | C-type lectin domain family 2 member D;Lectin-like NK cell receptor;LLT-1;Osteoclast inhibitory lectin |
| Description | Recombinant human CLEC2D protein with C-terminal 6×His tag |
| Delivery | In Stock |
| Uniprot ID | Q9UHP7 |
| Expression Host | HEK293 |
| Tag | C-6×His Tag |
| Molecular Characterization | CLEC2D(Arg60-Val191) 6×His tag |
| Molecular Weight | The protein has a predicted molecular mass of 16.2 kDa after removal of the signal peptide. The apparent molecular mass of CLEC2D-His is approximately 15-25 kDa due to glycosylation. |
| Purity | The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining. |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage & Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | This gene encodes a member of the natural killer cell receptor C-type lectin family. The encoded protein inhibits osteoclast formation and contains a transmembrane domain near the N-terminus as well as the C-type lectin-like extracellular domain. Several alternatively spliced transcript variants have been identified for this gene. [provided by RefSeq, Oct 2010] |
| Usage | Research use only |
| Conjugate | Unconjugated |
