

**PRODUCT INFORMATION**

|   |   |
|---|---|
| <b>Target</b>                           | CLEC2D  |
| <b>Synonyms</b>                         | CLAX;LLT1;OCIL  |
| <b>Description</b>                      | Recombinant Human CLEC2D Protein with N-terminal 6×His tag  |
| <b>Delivery</b>                         | In Stock  |
| <b>Uniprot ID</b>                       | Q9UHP7  |
| <b>Expression Host</b>                  | HEK293  |
| <b>Tag</b>                              | N-6×His Tag   |
| <b>Molecular Characterization</b>       | 6×His CLEC2D(Arg60-Val191)  |
| <b>Molecular Weight</b>                 | The protein has a predicted molecular mass of 16.2 kDa after removal of the signal peptide. The apparent molecular mass of His-CLEC2D is approximately 15-25 kDa due to glycosylation.  |
| <b>Purity</b>                           | The purity of the protein is greater than 90% as determined by SDS-PAGE and Coomassie blue staining.  |
| <b>Formulation &amp; Reconstitution</b> | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.  |
| <b>Storage &amp; Shipping</b>           | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.   |
| <b>Background</b>                       | This gene encodes a member of the natural killer cell receptor C-type lectin family. The encoded protein inhibits osteoclast formation and contains a transmembrane domain near the N-terminus as well as the C-type lectin-like extracellular domain. Several alternatively spliced transcript variants have been identified for this gene. [provided by RefSeq, Oct 2010] |
| <b>Usage</b>                            | Research use only   |
