Cat. No. FLP100601

PRODUCT INFORMATION

Tag C-Flag Tag
Target CTSR1

Synonyms CATSPER, SPGF7

DescriptionHuman CTSR1 full length protein-synthetic

nanodisc

Delivery 6~8weeks

Uniprot ID Q8NEC5

Expression Host HEK293

Protein Families Ion Channels: Other

Protein Pathways N/A

Molecular Weight

The human full length CTSR1 protein has a MW of

90.1kDa
Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Calcium ions play a primary role in the regulation of sperm motility. This gene belongs to a family of putative cation channels that are specific to spermatozoa and localize to the flagellum. The protein family features a single repeat with six

protein family features a single repeat with six membrane-spanning segments and a predicted calcium-selective pore region. [provided by

RefSeq, Jul 2008]

Usage Research use only

Conjugate Unconjugated
