Human CXCL6 (C-6His) Protein Cat. No. PME30076

PRODUCT INFORMATION

SynonymsC-X-C Motif Chemokine 6;Chemokine Alpha 3;CKA-3;Granulocyte Chemotatic Protein 2;CGCP-2;Small-Inducible Cytokine B6;CXCL6;GCP2;SCP86 Recombinant Human C-X-C Motif Chemokine 6 is produced by our Mammalian expression system and the target gene encoding GN38-Asn114 is expression with a 6His tag at the C-terminus.DeliveryIn StockUniprot IDP80162Expression HostHEK293TagNot availableMolecular CharacterizationNot availableMolecular9.35 KDaPurityThe purity of the protein is greater than 95% as determined by SDS-PAGE and Comassie blue staining.Formulation & ReconstitutionLyophilized from a 0.2 µm filtered solution of 200°C to -80°C for 12 months in lyophilized proteins are shipped at ambient temperature.Storage & ShippingStore at -20°C to -80°C for 12 months in lyophilized proteins are shipped at ambient temperature.BackgroundGenerative Chemokine GCXCL6) is a small cytokine belonging to the CXC chemokine at all the off the setteristic and activating factor and it exhibits extensive as in inflammatory mediator. It functionally uses bein of the IAS/CL2.BackgroundElexantic (ENA-78)/CXCL3. The human CXL6 is a rom granucytes indicating its potential role as an inflammatory mediator. It functionally uses bein of an UKCL3 is a been clone and is form granucytes indicating its potential role as an inflammatory mediator. It functionally uses bein of the LAS/CL3 receptors to chemoattract neutrophils but that is structurally most related to epithed and extred to epithed and etcred protein human CXLCL3 is a been clone and is physically mapped. the MAP-8 is CACL6 is a or on chromogeme 4. 	Target	CXCL6
Descriptionproduced by our Mammalian expression system and the target gene encoding (Gy38-Asn114 is expressed with a 6His tag at the C-terminus.DeliveryIn StockUniprot IDP80162Expression HostHEK293TagNot availableMolecular CharacterizationNot availableMolecular Weight9.35 KDaPurityThe purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.Formulation & ReconstitutionStore at -20°C to -80°C for 12 months in lyophilized from a 0.2 µm filtered solution of 20mM PB. 150mM Nacl, 5% Trehalose, ImM EDTA, pH 7.4.Storage & ShippingStore at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.BackgroundBackground and it exhibits extensive similarity to other CXC chemokines family. It is a potent neutrophil chemotactic and activating factor and it exhibits extensive similarity to other CXCL B receptors to the most related to epithelial cell-derived neutrophil but hat is structurally most related to epithelial cell-derived neutrophil portein with a predicted molecular weight of approximately 8 kDa. Human CXCL6 shares 60% and 67% as aidentity with mouse and bovine CXCL6, respectively.UsageResearch use only	Synonyms	3;CKA-3;Granulocyte Chemotactic Protein 2;GCP-2;Small-Inducible Cytokine
Unipro IDP80162Expression HostHEK293TagMolecular CharacterizationNot availableMolecular Weight9.35 KDaPurityThe purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.Formulation & 	Description	produced by our Mammalian expression system and the target gene encoding Gly38-Asn114 is

TagMolecular CharacterizationNot availableMolecular Weight9.35 KDaPurityThe purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.Formulation & ReconstitutionLyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, 5% Trehalose, 1mM EDTA, pH 7.4.Storage & ShippingStorage of C (Avoid repeated freezing and thawing). Lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.BackgroundBackgroundChemokine (C-X-C Abotif) Ligand 6 (CXCL6) is a small cytokine belonging to the CXC chemokine family, it is a potent neutrophil chemotactic and activating factor and it exhibits extensive similarity to other CXC Chemokine such as IL-8 and EINA-78. (CXCL6) can promote the release of MMP-9 from granulocytes indicating its potential role as an inflammatory mediator. It functionally uses both of the IL-8/CXCL8 receptors to chemoattract neutrophils but that is structurally most related to epithelial cell-derived neutrophil attractant-78 (ENA-78)/CXCL5. The human CXCL6 gene has been cloned and is physically mapped to the CXC Chemokine donecular weight of approximately 8 kDa. Human CXCL6 shares 60% and 67% aai dentity with mouse and bovine CXCL6, respectively.UsageResearch use only	Uniprot ID	P80162
Oblecular CharacterizationNot availableMolecular Weight9.35 KDaPurityThe purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.Formulation & ReconstitutionLyophilized from a 0.2 µm filtered solution of 200m PB, 150mM NaCl, 5% Trehalose, 1mM EDTA, pH 7.4.Storage & ShippingStorage & ShippingStorage & Shippinga 0.2 µm filtered freezing and thawing). Lyophilized for use within a month, aliguot and store at .80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. Chemokine (C-X-C-Motif) Ligand 6 (CXCL6) is a small cytokine belonging to the CXC chemokine such as IL-8 and ERA-78. CXCL6 can promote the release of MMP-9 from granulocytes indicating its potential role as an inflammatory mediator. It functionally uses both of the IL-8/CXCL8 receptors to chemoattract neutrophils but that is structurally most related to epithelia cell-derived neutrophil attractant-78 (ENA-78)/CXCL5. The human CXCL6 gene has been cloned and is physically mapped to the CXC chemokine locus on chromosome 4. Mature human CXCL6 is a 75 amino acid (aa) protein with a predicted molecular weight of approximately 8 kDa. Human CXCL6 shares 60% and 67% aai dentity with mouse and bovine CXCL6, respectively.UsageResearch use only	Expression Host	HEK293
CharacterizationNot availableMolecular Weight9.35 KDaPurityThe purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.Formulation & ReconstitutionLyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, 5% Trehalose, 1mM EDTA, pH 7.4.Storage & ShippingStore at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.BackgroundCA-C-Motif) Ligand 6 (CXCL6) is a small cytokine belonging to the CXC chemokine family. It is a potent neutrophil chemotactic and activating factor and it exhibits extensive similarity to other CXC chemokines such as IL-8 and ENA-78. CXCL6 can promote the release of MMP-9 from granulocytes indicating its potential role as an inflammatory mediator.
