Delivery

Formulation &

Reconstitution

Background

PRODUCT INFORMATION

Tag C-Flag Tag CXCR1 **Target**

C-C; C-C-CKR-1; CD128; CD181; CDw128a; CKR-1; **Synonyms**

CMKAR1; IL8R1; IL8RA; IL8RBA

Human CXCR1 full length protein-synthetic Description

nanodisc In Stock

Uniprot ID P25024 **Expression Host HEK293**

Protein Families Druggable Genome, GPCR, Transmembrane

Chemokine signaling pathway, Cytokine-cytokine receptor interaction, Endocytosis, Epithelial cell signaling in Helicobacter pylori infection **Protein Pathways**

The human full length CXCR1 protein has a MW of **Molecular Weight**

39.8 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

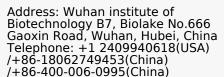

The protein is a member of the G-protein-coupled receptor family. This protein is a receptor for interleukin 8 (IL8). It binds to IL8 with high affinity, and transduces the signal through a G-protein activated second messenger system. Knockout studies in mice suggested that this protein inhibits embryonic oligodendrocyte

precursor migration in developing spinal cord. This gene, IL8RB, a gene encoding another high affinity IL8 receptor, as well as IL8RBP, a pseudogene of IL8RB, form a gene cluster in a region mapped to chromosome 2q33-q36.

Usage Research use only Conjugate Unconjugated

ELISA assay to evaluate CXCR1-Nanodisc 0.2µg Human CXCR1-Nanodisc per well

Figure 1. Elisa plates were pre-coated with Flag Tag CXCR1-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-CXCR1 monoclonal antibody (DMC100470) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-CXCR1 monoclonal antibody binding with CXCR1-Nanodisc is 2.330 ng/ml.

Figure 2. Human CXCR1-Nanodisc, Flag Tag on SDS-PAGE
