

PRODUCT INFORMATION

C-Flag Tag Tag

Target CXG2

CX46.6, Cx47, GJA12, HLD2, LMPH1C, LMPHM3, **Synonyms**

PMLDAR, SPG44

Human CXG2 full length protein-synthetic Description

nanodisc 6~8weeks

Delivery Uniprot ID Q5T442 HEK293 **Expression Host**

Protein Families Ion Channels: Other

Protein Pathways

Formulation &

Reconstitution

The human full length CXG2 protein has a MW of **Molecular Weight**

47kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a gap junction protein. Gap junction proteins are members of a large family of

homologous connexins and comprise 4

Background

transmembrane, 2 extracellular, and 3 cytoplasmic domains. This gene plays a key role in central myelination and is involved in peripheral myelination in humans. Defects in this

gene are the cause of autosomal recessive Pelizaeus-Merzbacher-like disease-1. [provided by
