

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

DRD1 **Target**

Synonyms DADR, DRD1A

Human DRD1-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P21728

Expression Host HEK293

Formulation & Reconstitution

Background

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, Monoamine **Protein Pathways** GPCRs, G-Protein Coupled Receptors Signaling

Pathway,

The human full length DRD1-Strep protein has a **Molecular Weight**

MW of 49.3 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping Lyophilized proteins are shipped at ambient

temperature.

This gene encodes the D1 subtype of the dopamine receptor. The D1 subtype is the most abundant dopamine receptor in the central nervous system. This G-protein coupled receptor stimulates adenylyl cyclase and activates cyclic AMP-dependent protein kinases. D1 receptors regulate neuronal growth and development, mediate some behavioral responses, and

modulate dopamine receptor D2-mediated events. Alternate transcription initiation sites result in two transcript variants of this gene.
