Background

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

DRD2 **Target**

D2DR; D2R **Synonyms**

Human DRD2-Strep full length protein-synthetic **Description**

nanodisc 6~8weeks

Uniprot ID P14416 **Expression Host HEK293**

Protein Families Druggable Genome, GPCR, Transmembrane

Gap junction, Neuroactive ligand-receptor **Protein Pathways**

interaction

The human full length DRD2-Strep protein has a **Molecular Weight**

MW of 50.6 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This G-protein coupled receptor inhibits adenylyl cyclase activity. A missense mutation in this gene causes myoclonus dystonia; other mutations have been associated with schizophrenia. Alternative splicing of this gene results in two transcript

variants encoding different isoforms. A third variant has been described, but it has not been determined whether this form is normal or due to

> Email: info@dimabio.com Website: www.dimabio.com

aberrant splicing.

Usage Research use only

Conjugate Unconjugated
