

PRODUCT INFORMATION

ENPP3 **Target**

Synonyms B10; NPP3; PDNP3; CD203c; PD-IBETA

Recombinant human ENPP3(94-159) Protein with Description

N-terminal human Fc tag

Delivery In Stock **Uniprot ID** 014638 **Expression Host HEK293**

Tag N-Human Fc tag

Molecular

Storage & Shipping

Background

Purity

hFc(Glu99-Ala330) ENPP3(Arg94-Pro159) Characterization

The protein has a predicted molecular mass of

33.7 kDa after removal of the signal peptide. The apparent molecular mass of hFc-ENPP3(94-159) is **Molecular Weight**

approximately 35-55 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene belongs to a series of ectoenzymes that are involved in hydrolysis of extracellular nucleotides. These ectoenzymes possess ATPase and ATP pyrophosphatase activities and are type II transmembrane proteins. Expression of the related rat mRNA has been found in a subset of immature glial cells and in the alimentary tract.

The corresponding rat protein has been detected in the pancreas, small intestine, colon, and liver. The human mRNA is expressed in glioma cells, prostate, and uterus. Expression of the human protein has been detected in uterus, basophils, and mast cells. Two transcript variants, one

protein coding and the other non-protein coding, have been found for this gene. [provided by

RefSeq, Oct 2015] Research use only

Usage Conjugate Unconjugated
