

PRODUCT INFORMATION

Tag C-Flag&Strep Tag

Target GBRA3
Synonyms N/A

DescriptionHuman GBRA3-Strep full length protein-synthetic

nanodisc

Delivery 6~8weeks

Uniprot ID P34903

Expression Host HEK293

Protein Families Ion Channels: Cys-loop Receptors

Protein Pathways N/A

Molecular Weight

The human full length GBRA3-Strep protein has a

MW of 55.2 kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5%
– 8% trehalose is added as protectants before
lyophilization. Please see Certificate of Analysis
for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

GABA is the major inhibitory neurotransmitter in the mammalian brain where it acts at GABA-A receptors, which are ligand-gated chloride channels. Chloride conductance of these channels

channels. Chloride conductance of these channels can be modulated by agents such as

can be modulated by agents such as benzodiazepines that bind to the GABA-A receptor. At least 16 distinct subunits of GABA-A receptors have been identified. [provided by

RefSeq, Jul 2008]

Usage Research use only

Conjugate Unconjugated
