Cat. No. FLP100121

## **PRODUCT INFORMATION**

Tag C-Flag Tag **Target** GLP1R

**Synonyms** GLP-1; GLP-1-R; GLP-1R

Human GLP1R full length protein-synthetic **Description** 

nanodisc **Delivery** In Stock **Uniprot ID** P43220 **Expression Host HEK293** 

Formulation &

Reconstitution

Storage & Shipping

Druggable Genome, ES Cell Differentiation/IPS, **Protein Families** 

GPCR, Transmembrane

**Protein Pathways** Neuroactive ligand-receptor interaction

The human full length GLP1R protein has a MW of **Molecular Weight** 

53.0 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

A 7-transmembrane protein that functions as a receptor for glucagon-like peptide 1 (GLP-1) hormone, which stimulates glucose-induced insulin secretion. This receptor, which functions at the cell surface, becomes internalized in response to GLP-1 and GLP-1 analogs, and it plays an important role in the signaling cascades leading

**Background** to insulin secretion. It also displays

neuroprotective effects in animal models. Polymorphisms in this gene are associated with diabetes. The protein is an important drug target for the treatment of type 2 diabetes and stroke. Alternative splicing of this gene results in multiple

transcript variants.

**Usage** Research use only Conjugate Unconjugated

## ELISA assay to evaluate GLP1R-Nanodisc 0.2μg Human GLP1R-Nanodisc per well

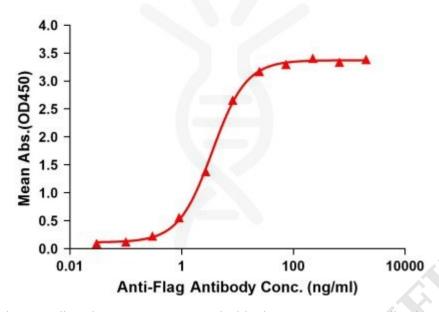

Figure 1. Elisa plates were pre-coated with Flag Tag GLP1R-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with GLP1R-Nanodisc is 3.549ng/ml.

Figure 2. Human GLP1R-Nanodisc, Flag Tag on SDS-PAGE
