Cat. No. FLP100261

PRODUCT INFORMATION

C-Flag Tag Tag GP119 **Target** GPCR2 **Synonyms**

Human GP119 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q8TDV5 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

Protein Pathways Metabolic and Obesity,

The human full length GP119 protein has a MW of **Molecular Weight**

36.9kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Lyophilized from nanodisc solubilization buffer (20

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient témperature.

This gene encodes a member of the rhodopsin subfamily of G-protein-coupled receptors that is expressed in the pancreas and gastrointestinal tract. The encoded protein is activated by lipid amides including lysophosphatidylcholine and oleoylethanolamide and may be involved in

glucose homeostasis. This protein is a potential

drug target in the treatment of type 2 diabetes.[provided by RefSeq, Jan 2010]

Usage Research use only Conjugate Unconjugated

Background
