Cat. No. FLP100266

PRODUCT INFORMATION

Target GP143

Synonyms NYS6, OA1

DescriptionHuman GP143 full length protein-synthetic

Delivery nanodisc 6~8weeks
Uniprot ID P51810

Expression Host HEK293

Protein Families Transmembrane, Druggable Genome,

Protein Pathways GPCRDB Other,

Molecular Weight

The human full length GP143 protein has a MW of

43.9kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5%

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

for specific instructions. Do not use solvents with pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a protein that binds to heterotrimeric G proteins and is targeted to melanosomes in pigment cells. This protein is thought to be involved in intracellular signal transduction mechanisms. Mutations in this gene

cause ocular albinism type 1, also referred to as Nettleship-Falls type ocular albinism, a severe visual disorder. A related pseudogene has been identified on chromosome Y. [provided by RefSeq,
