Cat. No. FLP100304

Formulation & Reconstitution

Storage & Shipping

PRODUCT INFORMATION

Tag C-Flag Tag

Target GPR32

Synonyms RVDR1

DescriptionHuman GPR32 full length protein-synthetic

nanodisc

Delivery 6~8weeks

Uniprot ID 075388

Expression Host HEK293

Protein Families GPCR, Transmembrane, Druggable Genome,

Protein Pathways GPCRDB Class A Rhodopsin-like,

Molecular Weight

The human full length GPR32 protein has a MW of

40.1kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene is intronless and encodes a member of the G-protein coupled receptor 1 family. The encoded protein binds to resolvin D1 and lipoxin

Background A4 and has been linked to pulmonary

inflammation. A related pseudogene has been identified on chromosome 19. [provided by

RefSeq, Nov 2012]

Usage Research use only

Conjugate Unconjugated
