Cat. No. FLP100306

PRODUCT INFORMATION

Tag C-Flag Tag
Target GPR35

Synonyms G-protein coupled receptor 35; Kynurenic acid

receptor (KYNA receptor)

DescriptionHuman GPR35 full length protein-synthetic

nanodisc 6~8weeks

Delivery 6~8weeks
Uniprot ID Q9HC97
Expression Host HEK293

Formulation &

Storage & Shipping

Protein Families GPCR, Transmembrane, Druggable Genome,

Protein Pathways GPCRDB Class A Rhodopsin-like,

Molecular Weight
The human full length GPR35 protein has a MW of

34.1kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Acts as a receptor for kynurenic acid, an intermediate in the tryptophan metabolic

Background pathway. The activity of this receptor is mediated by G-proteins that elicit calcium mobilization and

inositol phosphate production through G(qi/o) proteins.[UniProtKB/Swiss-Prot Function]
