

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

GPR39 **Target** 

**Synonyms** G-protein coupled receptor 39

**HEK293** 

Human GPR39-Strep full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** 043194

**Protein Families** GPCR, Transmembrane, Druggable Genome,

**Protein Pathways** 

**Expression Host** 

Storage & Shipping

**Background** 

The human full length GPR39-Strep protein has a **Molecular Weight** 

MW of 51.3 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized from nanodisc solubilization buffer (20

Lyophilized proteins are shipped at ambient

témperature.

This gene is a member of the ghrelin receptor family and encodes a rhodopsin-type G-protein-coupled receptor (GPCR). The encoded protein is involved in zinc-dependent signaling in epithelial

tissue in intestines, prostate and salivary glands. The protein may also be involved in the

pathophysiology of depression. [provided by RefSeq, Jun 2016]

**Usage** Research use only

Conjugate Unconjugated
