Cat. No. FLP100845

**Delivery** 

**Background** 

## **PRODUCT INFORMATION**

GRIK3 **Target** 

EAA5, GLR7, GLUR7, GluK3, GluR7a **Synonyms** 

Human GRIK3 full length protein-synthetic **Description** 

nanodisc 6~8weeks

**Uniprot ID** Q13003 **Expression Host HEK293** 

**Protein Families** Ion Channels: Glutamate Receptors

**Protein Pathways** 

The human full length GRIK3 protein has a MW of **Molecular Weight** 

104kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature. Glutamate receptors are the predominant

excitatory neurotransmitter receptors in the mammalian brain and are activated in a variety of

normal neurophysiologic processes. This gene product belongs to the kainate family of glutamate receptors, which are composed of four

subunits and function as ligand-activated ion channels. It is not certain if the subunit encoded by this gene is subject to RNA editing as the other 2 family members (GRIX1 and GRIX2). A

Ser310Ala polymorphism has been associated with schizophrenia, and there are conflicting reports of its association with the pathogenesis of deliving transports also believed for the pathogenesis of deliving transports.
