

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target HCAR3

Synonyms GPR109B, HCA3, HM74, PUMAG, Puma-g

Human HCAR3-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks

Uniprot ID P49019 **Expression Host HEK293**

Formulation &

Reconstitution

Storage & Shipping

Background

Usage

Protein Families GPCR, Transmembrane, Druggable Genome,

Chemokines, Chemokine and Receptor, G-Protein **Protein Pathways**

Coupled Receptors Signaling Pathway,

The human full length HCAR3-Strep protein has a **Molecular Weight**

MW of 44.5 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Receptor for 3-OH-octanoid acid mediates a negative feedback regulation of adipocyte lipolysis to counteract prolipolytic influences under conditions of physiological or pathological increases in beta-oxidation rates. Acts as a low affinity receptor for nicotinic acid. This pharmacological effect requires nicotinic acid

doses that are much higher than those provided by a normal diet.[UniProtKB/Swiss-Prot Function]
