

PRODUCT INFORMATION

Tag C-Flag Tag

Target HCN2

Synonyms BCNG-2, BCNG2, HAC-1

DescriptionHuman HCN2 full length protein-synthetic

nanodisc

Delivery 6~8weeks

Uniprot ID Q9UL51

Expression Host HEK293

Protein Families Ion Channels: Cyclic nucleotide gated

Protein Pathways N/A

Storage & Shipping

Background

Molecular Weight

The human full length HCN2 protein has a MW of

97kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5%
– 8% trehalose is added as protectants before
lyophilization. Please see Certificate of Analysis
for specific instructions. Do not use solvents with

Reconstitutionfor specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a hyperpolarization-activated cation channel involved in the generation of native pacemaker activity in the heart and in the brain. The encoded protein is activated by cAMP and can produce a
