

## **PRODUCT INFORMATION**

Target IgHE Synonyms IgE

**Description**Recombinant Human IGHE Protein with C-terminal

6×His tag In Stock

Uniprot ID P01854
Expression Host HEK293

**Tag** C-6×His Tag

Molecular Characterization

**Delivery** 

**Purity** 

**Background** 

acterization IGHE(Ala1-Lys428) 6×His tag

Molecular Weight The protein has a predicted molecular mass of 47.8 kDa after removal of the signal peptide.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before

Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

Predicted to enable antigen binding activity and immunoglobulin receptor binding activity. Predicted to be involved in several processes, including activation of immune response; defense response to other organism; and phagocytosis. Predicted to be located in extracellular region.

Predicted to be part of immunoglobulin complex, circulating. Predicted to be active in external side of plasma membrane. [provided by Alliance of

Genome Resources, Apr 2022]

Usage Research use only
Conjugate Unconjugated
