Cat. No. PME30068

Description

**Background** 

## **PRODUCT INFORMATION**

11 -4 **Target** 

Interleukin-4;IL-4;B-Cell Stimulatory Factor **Synonyms** 1;BSF-1;Binetrakin;Lymphocyte Stimulatory

Factor 1; Pitrakinra; IL4

Recombinant Human Interleukin-4 is produced by our Mammalian expression system and the target gene encoding His25-Ser153 is expressed with a Fc tag at the C-terminus.

**Delivery** In Stock P05112 **Uniprot ID Expression Host HEK293** C-Fc Tag Tag

Molecular Not available Characterization **Molecular Weight** 41.9 KDa

Greater than 95% as determined by reducing **Purity** 

Lyophilized from a 0.2  $\mu m$  filtered solution of PBS, pH 7.4. Formulation &

Reconstitution

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Storage & Shipping Lyophilized proteins are shipped at ambient

temperature.

Interleukin-4 (IL-4) is a pleiotropic cytokine that regulates diverse T and B cell responses including cell proliferation, survival and gene expression.
IL-4 is produced by mast cells, T cells, and bone
marrow stromal cells. IL-4 regulates the
differentiation of naive CD4 T cells into helper Th2

cells, characterized by their cytokine-secretion profile that includes secretion of IL-4, IL-5, IL-6, IL-10, and IL-13, which favor a humoral immune response. Another dominant function of IL-4 is the

regulation of immunoglobulin class switching to the IgG1 and IgE isotypes. Excessive IL-4 production by Th2 cells has been associated with elevated IgE production and allergic response.
