

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target KCAB3

Synonyms AKR6A9, KCNA3.1B, KCNA3B, KV-BETA-3

Human KCAB3-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** 043448

Expression Host HEK293

Protein Families Ion Channels: Other

Protein Pathways N/A

Storage & Shipping

Background

The human full length KCAB3-Strep protein has a **Molecular Weight**

MW of 43.7 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation &

Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Lyophilized from nanodisc solubilization buffer (20

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the potassium channel, voltage-gated, shaker-related subfamily. The encoded protein is one of the beta subunits, which are auxiliary proteins associating with functional Kv-alpha subunits. The encoded protein

forms a heterodimer with the potassium voltage-gated channel, shaker-related subfamily, member 5 gene product and regulates the activity of the

alpha subunit. [provided by RefSeq, May 2012]
