

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

**Target** LPAR3

EDG7, Edg-7, GPCR, HOFNH30, LP-A3, LPA3, **Synonyms** 

RP4-67813

Human LPAR3-Strep full length protein-synthetic Description

nanodisc

**Delivery** 6~8weeks **Uniprot ID** Q9UBY5 **HEK293 Expression Host** 

Formulation &

Reconstitution

Storage & Shipping

**Background** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

**Protein Pathways** G-Protein Coupled Receptors Signaling Pathway,

The human full length LPAR3-Strep protein has a **Molecular Weight** 

MW of 40.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the G protein-coupled receptor family, as well as the EDG family of proteins. This protein functions as a cellular receptor for lysophosphatidic acid and

mediates lysophosphatidic acid-evoked calcium mobilization. This receptor couples predominantly to G(2(11)) alpha proteins. [provided by RefSeq,
