Cat. No. FLP100337

## **PRODUCT INFORMATION**

C-Flag Tag Tag LPAR4 **Target** 

**Synonyms** GPR23, LPA4, P2RY9, P2Y5-LIKE, P2Y9 Human LPAR4 full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q99677 **Expression Host HEK293** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, Nucleotide **Protein Pathways** GPCRs,

**Molecular Weight** 41.9kDa

Formulation &

Reconstitution

Storage & Shipping

**Background** 

The human full length LPAR4 protein has a MW of

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the lysophosphatidic acid receptor family. It may also be related to the P2Y receptors, a family of

receptors that bind purine and pyrimidine nucleotides and are coupled to G proteins. The encoded protein may play a role in monocytic differentiation. [provided by RefSeq, Feb 2009]
