Cat. No. FLP100339

## **PRODUCT INFORMATION**

C-Flag Tag Tag LPAR6 **Target** 

**Synonyms** ARWH1, HYPT8, LAH3, LPA-6, P2RY5, P2Y5 Human LPAR6 full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** P43657 **Expression Host HEK293** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, Nucleotide **Protein Pathways** GPCRs,

**Background** 

The human full length LPAR6 protein has a MW of **Molecular Weight** 39.4kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene belongs to the family of G-protein coupled receptors, that are preferentially activated by adenosine and uridine nucleotides. This gene aligns with an internal intron of the retinoblastoma susceptibility gene in

the reverse orientation. Alternative splicing results in multiple transcript variants. [provided
