

PRODUCT INFORMATION

Tag C-Flag&Strep Tag

Target LT4R2

BLT2, BLTR2, JULF2, KPG 004, LTB4-R 2, LTB4-R2, **Synonyms**

NOP9

Human LT4R2-Strep full length protein-synthetic Description

nanodisc

Delivery 6~8weeks **Uniprot ID** Q9NPC1 **Expression Host HEK293**

Formulation &

Reconstitution

Storage & Shipping

Background

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Other, Asthma, Autoimmune & **Protein Pathways**

Inflammatory Response,

The human full length LT4R2-Strep protein has a MW of 37.9 kDa **Molecular Weight**

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

Low-affinity receptor for leukotrienes including leukotriene B4. Mediates chemotaxis of

granulocytes and macrophages. The response is

mediated via G-proteins that activate a

phosphatidylinositol-calcium second messenger system. The rank order of affinities for the léukotrienes is LTB4 > 12-epi-LTB4 > LTB5 >
