

PRODUCT INFORMATION

C-Flag Tag Tag MCHR1 **Target**

Synonyms GPR24, MCH-1R, MCH1R, SLC-1, SLC1 Human MCHR1 full length protein-synthetic

Description nanodisc **Delivery** 6~8weeks

Uniprot ID Q99705 **Expression Host HEK293**

Formulation & Reconstitution

Storage & Shipping

Background

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, Metabolic and **Protein Pathways**

Obesity,

The human full length MCHR1 protein has a MW **Molecular Weight**

of 46kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene, a member of the G protein-coupled receptor family 1, is an integral plasma membrane protein which binds melanin-concentrating hormone. The encoded protein can inhibit cAMP accumulation and stimulate intracellular calcium flux, and is

probably involved in the neuronal regulation of food consumption. Although structurally similar to somatostatin receptors, this protein does not seem to bind somatostatin. [provided by RefSeq,

Jul 2008]

Usage Research use only

Conjugate Unconjugated
